C Language Applications

Application Of C Programming

C Programming is best known programming language. C Programming is near to machine as well as human so it is called as Middle level Programming Language (<http://www.c4learn.com/c-programming/middle-level-language/>). C Programming can be used to do variety of tasks such as networking related, OS related.

Application of C Programming are listed below –

1. C language is used for creating **computer applications**
2. Used in writing **Embedded softwares**
3. Firmware for various electronics, industrial and communications products which use micro-controllers.
4. It is also used in developing **verification software, test code, simulators** etc. for various applications and hardware products.
5. **For Creating Compiles** of different Languages which can take input from other language and convert it into lower level machine dependent language.
6. C is used to implement different **Operating System Operations**.
7. **UNIX kernel** (<http://img.c4learn.com/2012/01/Unix-Operating-System-Application-of-C-Programming-Language.png>) is completely developed in C Language.

List of Applications of C Programming

List of Application		
List of Application		
Operating Systems <small>c4learn.com Learning Made Simple</small>	Network Drivers	Print Spoolers
(http://www.c4learn.com/) Language Compilers (http://www.c4learn.com/c-programming/what-is-compiler/)	Assemblers	Text Editors
Modern Programs	Data Bases	Language Interpreters
Simulators	Utilities	Embedded System
